SUMMARY

With four years of experience in digital marketing and website development, I have developed a strong analytical mindset and a passion for data. My current focus is on building the technical skills required for a career in Data Engineering and Data Science. I am actively learning how to manage databases and build back-end systems to support data pipelines and ETL processes. I am driven by the challenge of solving problems and using data to generate valuable insights and architect effective solutions across various industries.

WORK EXPERIENCE

PT. Satustop Finansial Solusi (Nabati Group)

Bandung

SQL Database Administrator

Nov 2022 - Present

- Perform routine database maintenance, including backups and optimization, to ensure optimal performance and data integrity.
- Troubleshoot and resolve database-related issues reported by end-users or monitoring tools.
- Optimize database queries and stored procedures to improve performance and efficiency.
- Maintain accurate documentation of database configurations, procedures, and troubleshooting steps.
- Generate regular reports on database performance, usage, and maintenance activities for management review.
- Collaborate with other IT teams and business stakeholders to understand database requirements and priorities.
- Building a dashboard in Python using Streamlit

Ada Ide Indonesia

Bandung

SEO & SEM Specialist

Mar 2022 - Nov 2022

- Monitor key SEO metrics, including organic traffic, keyword rankings, and backlink profile, using tools like Google Analytics, Google Search Console, and third-party SEO software.
- Analyze keyword competitiveness and search volume to prioritize target keywords for optimization efforts.
- Create and optimize ad copy and landing pages to improve click-through rates (CTR) and conversion rates.
- Monitor and adjust campaign budgets, bids, and targeting settings to maximize ROI.
- Track and analyze campaign performance metrics, such as impressions, clicks, conversions, and cost per acquisition (CPA).
- Provide recommendations for campaign optimization based on performance insights.
- Collaborate with the marketing and development teams to ensure accurate data tracking and reporting.
- Troubleshoot and resolve issues related to tag implementation and data discrepancies.

• Supports SEO and content optimization across channels in collaboration with marketing, creative, and engineering teams, involving article writing, SEM content creation, metadata, copy review, image optimization management, and SEO testing of web pages.

- Works with the data analytics team to continuously track and analyze traffic and user behavior for ongoing success measurement.
- Analyzes performance ranking data and crawl logs, providing recommendations to team members in technical and non-technical disciplines.
- Examines on-page, off-page, and technical factors of the site, offering suggestions to improve overall SEO health.
- Performs keyword research, technical audits, content audits, and competitor analysis to uncover new SEO opportunities.
- Optimizes key on-page elements, including navigation, internal links, semantic markup, crawling/indexing directives, title tags, meta descriptions, h1 headers, and more
